

The Leader in Sound Card Interfaces

A RIGblaster is the easiest way to properly connect your radio to a computer so that you may operate using over 100 existing and future ham radio sound card software programs. You will be able to operate any sound-card based digital mode that your radio could not otherwise operate.

Your computer and a RIGblaster can take the place of old expensive adapters or TNC's and are the standard for sound card interfaces.

West Mountain Radio offers multiple feature rich RIGblaster models. The overview table below can help you determine which RIGblaster model suits your needs.

Feature	Pro	Advantage	Blue	Plus II	Plug & Play	Nomic
Price	\$449.95	\$319.95	\$319.95	POA	POA	\$109.95
